EXAMINER'S AMENDMENT

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/9/2004 has been entered. Claims 1-17 are pending and allowed.
2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 14 has been amended to depend upon claim 9 instead of claim 1, otherwise claim 14 would be a duplicate of claim 6.

3. The following is an examiner's statement of reasons for allowance: The cited prior art do not teach or fairly suggest a near field light generating device comprising a thin film on a light exit surface, wherein the thin film is configured to release emitting light as **near field light** from an area of the thin film when the thin film is irradiated with light from the light emitting element and to block light from the area of the thin film when the thin film is not irradiated with light from the light emitting element. As persuasively pointed out by applicant in the remarks dated 3/9/2004 on page 5, no part of Gasser

Art Unit: 2828

states that only a portion of Gasser's passivation film is transparent so as to generate the near field light.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
